CAUTION

This chart is for guidance only. Care should be taken when choosing the correct model to establish the type and concentration of hazard involved.

OEL = Occupational Exposure Limit

A level of contamination (set by the HSE) of the concentration of an airborne substance, above which level precautions must be taken if exposure takes place.

For further guidance on applications, and for further details of our ranges of flat and moulded disposable respirators and information on other Alpha Solway products, please contact our sales office on 01461 202452.

9020W

this town ain't big enough for the both of us!

NEW Moulded disposable respirator from Alpha Solway
CONFORMING TO EN149 : 2001

the new 9020W

- Protects against metal dusts and welding fumes up to APF10 x OEL.
- Extra protection against ozone and nuisance odours generated by Mig, Tig and Arc welding.
- Full faceseal for added comfort.
- Exhalation valve to assist in reducing build up of heat and moisture on the face.
- Adjustable head straps.
- Low profile design for use with welding shields, masks and goggles.
- Lightweight construction providing a more comfortable option than other available products.

Alpha Solway are experienced specialists in the supply and manufacture of superior quality, disposable respirators.

Completing the 9000 range, Alpha Solway has now released a moulded, disposable respirator dedicated to the welding and metalworking industry.

Designed to be worn in conjunction with various types of eye and face protection, this product offers increased wearer comfort and breathability in a hot, humid and difficult environment.
