

Finite PF™

A soft and flexible nitrile disposable glove

Finite PF™ from Polyco is a powder free nitrile disposable glove which is compliant to European Standard EN374, providing an effective barrier against oils, acids and other chemicals.

The nitrile synthetic rubber that is used to manufacture the Finite PF™ is extremely soft and flexible providing unparalleled comfort and sensitivity, yet it maintains a tensile strength that is comparable to natural rubber. The cuff is beaded further adding to its strength and preventing liquid roll back. Containing none of the proteins that are present in latex, it eliminates the risk of protein sensitisation. It is also powder free reducing the possibility of product contamination. Offering good chemical and mechanical properties for a disposable glove, it is highly versatile and suitable for many different uses. The Finite PF™ has an AQL rating of 1.5 and has been tested in accordance with EN1186 making it suitable for food contact.

Case Quantity
100 gloves per polybag
10 dispensers per case

Typically Used for

- Food Processing
- Laboratory Work
- Electronics
- General Assembly
- Automotive Maintenance & Repair
