

Distel

High-Level Environmental Disinfectant CLP Compliance Factsheet

The appearance of Distel Environmental products is changing to comply with the new Classification, Labelling and Packaging (CLP) Regulation.

CLP is the European Interpretation of GHS (Global Harmonisation System) for Classification, which is a UN initiative introduced in 1992. Its aim is to drive greater consistency in chemical labelling across the world, with the goal of increasing user and environmental safety associated with use of chemicals.

The CLP Regulation replaces the Dangerous Substances Directive (DSD) and the Chemicals Hazard Information and Packaging for Supply (CHIP) Regulation.

CLP becomes mandatory from 1 June 2015. This means that the appearance of labels and Material Safety Data Sheets of Distel Environmental products will change. Already manufactured and labelled products will continue to be supplied after 1 June 2015 until stocks last, resulting in a mix of CHIP and CLP labels during a short period.

Please contact your local Tristel representative or Customer Services to request CLP Material Safety Data Sheets.

For further detailed information regarding the CLP Regulation, please visit www.echa.europa.eu.

 **Distel is manufactured in Great Britain by:**
Tristel Solutions Limited, Lynx Business Park,
 Fordham Road, Snailwell, Cambridgeshire, CB8 7NY, UK

New CLP signal word 'Danger' and hazard statement

Distel High-Level Environmental Disinfectant

Distel disinfectant is tested at user dilutions by an EPA approved laboratory and by independent UK Government registered laboratories. Effective against a wide range of micro-organisms including HIV, Hepatitis B, Norovirus, E. Coli, *Staphylococcus* spp., *Staphylococcus* spp., *Pseudomonas aeruginosa*, *Campylobacter jejuni*, *Candida albicans*.

- Directions for use**
- Remove solid waste before application as a disinfectant.
 - Spray surface. Wipe clean and dry with disposable towel.
 - Use at 1:200 for general low risk applications.
 - Use at 1:100 for solid and high risk areas.
 - When diluted at recommended concentrations (1:100 and 1:200), Distel High-Level Environmental Disinfectant is not classified as hazardous.

- Contains**
- Polymeric biguanide hydrochloride <21g/kg.
 - Didecyl dimethyl ammonium chloride <23g/kg.
 - Alkyldimethyl benzyl ammonium chloride <13g/kg.
- (The active ingredients within this product are exempt for approval under the Biocidal Products Regulations (EU) No. 528/2012).

- Distel is non-selective and effective at a dilution of 2:100**
- In 5 minutes against: *Proteus vulgaris*, *Campylobacter jejuni*, *Rebsiella* spp., *Enterococcus* spp., E. Coli, *Staphylococcus* spp., MRSA, *Pseudomonas* spp.
 - In 30 minutes against: Hepatitis B, Adenovirus, HIV, Norovirus, Coronavirus, *Microsporus* spp., *Mycobacterium fortuitum*, bovis, terae and avium.
 - In 60 minutes against: *Trichophyton* spp.

- Danger**
- Causes skin irritation.
 - May cause an allergic skin reaction.
 - Causes serious eye damage.
 - Suspected of causing cancer.
 - May cause damage to organs through prolonged or repeated exposure inhalation.
 - Harmful to aquatic life with long lasting effects.

- Precautions**
- Do not breathe the mist / spray.
 - Wear protective gloves / protective clothing / eye protection.
 - IF ON SKIN:** Wash with soap and water.
 - IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
 - If skin irritation or rash occurs get medical advice.
